

Waha Oil Company awards Zulal Water Technology with Supply Order of 150 m³/day Well-Water RO Containerized Plant at Samah

Tripoli, 12th March, 2024

Zulal Water Technology (ZWT) has recently been awarded a supply order by Waha Oil Company (WOC), to provide a Containerized RO Plant with capacity 150 m³/day of potable water production, complete with all pre- and post-treatment systems for WOC's Samah Field.

Waha Oil Company is one of Libya's largest oil-producers, and followed a competitive procurement process to order this RO plant to cater the urgent water requirements of their Samah field. WOC has been looking for an advanced technology and ZWT has been selected based on their proven ability to deliver high quality water treatment plants in a short time frame, which ZWT have demonstrated frequently to WOC especially in five previous EPC water plant projects at various sites including Gialo field, Essider terminal, Waha field and Tripoli Warehouse.

Iftikhar-ul-Haq, Managing Director of ZWT, said: "This purchase order from WOC reflects ZWT's strong reputation and proven track record within the Libyan market. We look forward to working again with our long term client WOC and are confident of delivering the 150 m³/day containerized RO Plant on time to WOC's satisfaction."
