

EPC Water Desalination RO Plant with ReidSteel Building

Client: **Waha Oil Company**

Location: **Essider Terminal**

Equipment: **Brackish Water RO Desalination Plant**

Design: **600m³/day Permeate from Well water**

Application: **Drinking**

Year: **2014**

Scope:

- **Engineering & Design** – Technical drawings, compliance with **RO system standards**, risk assessments.
- **Procurement & Fabrication** – RO membranes, filtration units, pumps, dosing systems, QA/QC inspections.
- **Civil Works** – Site prep, foundation construction, drainage, and structural supports.
- **RO System Installation** – Assembly of Degasser, pre-treatment (softeners, carbon filters), RO membranes, and post-treatment units.
- **Instrumentation & Control** – Automatic Control, integration of SCADA systems, monitoring sensors, and calibration of flow/pressure transmitters.
- **Prefabricated Building Erection** – Installation of ReidSteel UK structure, including ventilation, electrical, and safety systems.
- **Commissioning & Handover** – Performance testing, water quality validation, and final documentation.
